

The Nalanda Hindu University, an Archeological View
by Potluri Rao In Seattle ©2018 (CC BY 4.0)

Four thousand years ago, there was a Hindu University at the location of the Nalanda ruins, near Bodh Gaya (Bihar State). The original Rig Veda, Upanishads, and Bhagavad Gita were textbooks on logic at the university. The original Bhagavad Gita was an articulation of the Hindu Scientific Method, the Hinduism. Hinduism was a system of logic, not a religion. Around 500 CE, Greeks entered the Nalanda area, and converted the Hindu University into a Buddhist University. They deliberately and totally destroyed the University and the Hindu Civilization. The textbooks on logic were vandalized to worship manuals of fictional warmongering gods with supernatural powers to promote idolatry. The Greeks assassinated the Hindu Scientific Method of thousands of years.

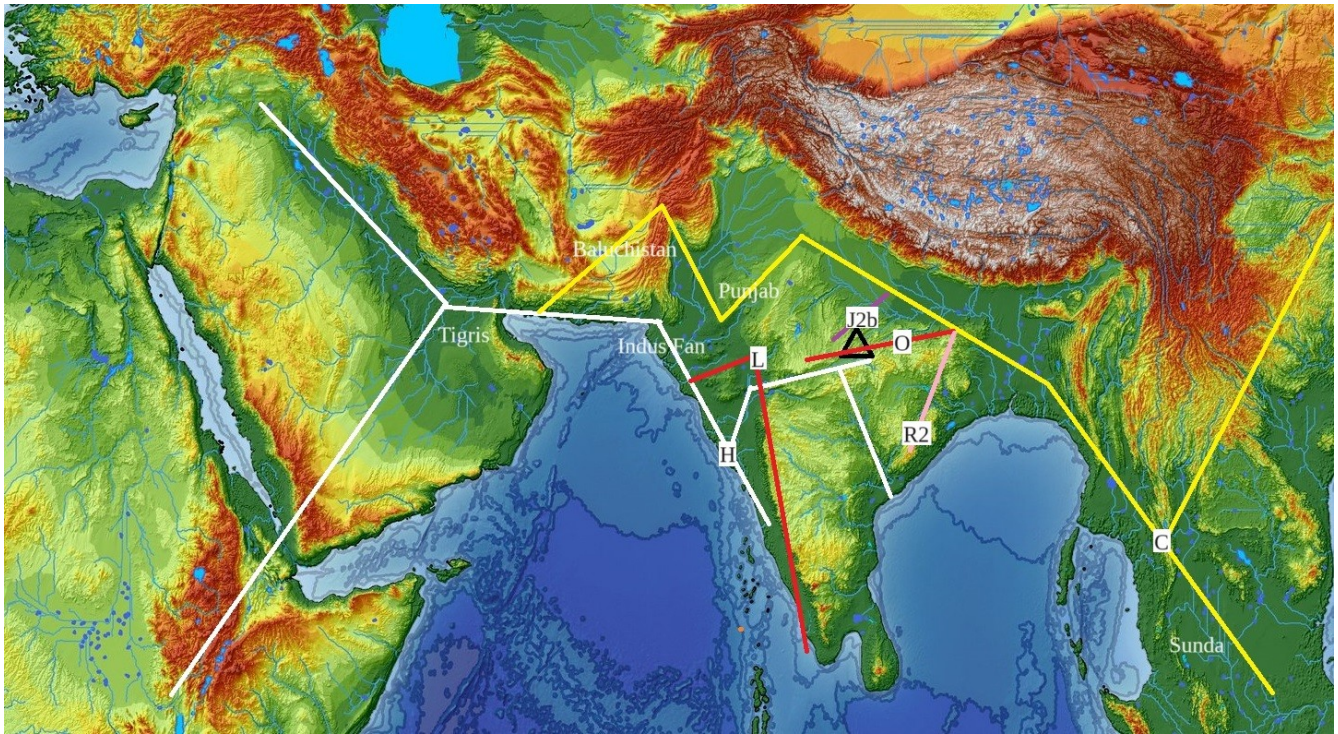

What follows is an analysis of archeological evidence to trace the history of the lost Hindu University.

Humans originated in Central Africa 200 thousand years ago. People who share the same DNA are called a Haplogroup. Eighty thousand years ago, the Haplogroup F voluntarily migrated out of Africa and reached the Mt. Trikuta area of the Vindhya. They were advanced logic-based cultures of adventurous pioneers, entrepreneurs, technicians, planners, and engineers who wanted to explore the new worlds. They lived at the Trikuta in peace and prosperity until their cultures were deliberately and totally destroyed by the recent primitive ignorance-based warmongering Europeans (DNA R1) who entered their space after 500 CE with fictional gods with supernatural powers.

An analysis of DNA samples of Indian populations suggested that all of them (H, L, O, R2, J2b) were derived from the F. The recent immigrant Europeans (R1) who destroyed the Hindu civilization are insignificant in number. They were the plague that wiped out the Hindu who had no natural immunity.

Sixty thousand years ago, much of the world was covered with glaciers, and the seawater was 500 feet below the current levels. We used computer simulations to generate the landscape of that period. The Atlas revealed a fascinating story of human migrations from Africa to the Trikuta that is consistent with the DNA.

Sixty thousand years ago, the current Red Sea was a freshwater lake, the current Persian Gulf was the Tigris river, the West Coast of India extended over 100 miles to reach the then Arabian Sea. The Tigris and Indus Fan are now submerged under 500 feet of water, and the F were forced to relocate to the Trikuta.

The above maps are computer generated analytical representation of topography. They represent the landscape at the time of migration of the F from Africa to the Mt. Trikuta.

Eighty thousand years ago, the entrepreneurial F discovered a pass in the African mountain ridge and reached the Red Sea lake, a giant oasis of inexhaustible supply of rainwater. Seventy thousand years ago, they moved to the Tigris. At the Tigris, they were split into the subgroups: H, L, O, R2, and J2.

Sixty thousand years ago, some of the F moved south along the West Coast to reach the Narmada delta, near Mumbai (Bombay), and some moved along the yellow line to the east side of India, the Bay of Bengal (Sunda). The Indus river was not rainwater, it was snowmelt water of the Himalayas. The F stayed only along rainwater rivers and lakes. They avoided all the snowmelt water rivers of the Himalayas like the plague.

The Mt. Trikuta was surrounded by a catch basin with inexhaustible supply of rainwater captured by the Satpura range. It was the headwaters to many rivers. The rainwater river Yamuna spread from Punjab to Sunda. The F followed rainwater rivers and lakes from Balochistan to Punjab to Sunda (yellow line).

The F lived only on the Narmada delta on the west side, and Sunda on the east side.

Twenty thousand years ago, the glaciers started to melt and Narmada delta and Sunda were submerged. The F were forced to relocate to the Trikuta, the only source of perennial rainwater.

The three rivers that originated at the Trikuta, the Narmada, Ken, and Sone were perennial, with year-round rainwater even during the frequent droughts.

The three subgroups of the F (H, O, J2b) moved to the Trikuta twenty thousand years ago. They lived along separate rivers as separate cultures. They were aware of each other, with no social interaction or integration.

Around 2,200 BCE, there was a global drought that lasted for almost two hundred years. The Trikuta basin dried out. All the three civilizations (J2b, O, H) were forced to move to the Ghaghara river, where the four tributaries met, the only place with water. It was a catastrophe they were forced to endure for nearly two hundred years. They evolved into a new social order, the Hindu civilization. It was a synthesis of the three advanced logic-based civilizations (J2b, O, H).

The catastrophe taught the Hindu a valuable lesson. They were able to survive only because of their logic. They recognized that logic is the only means to understand the Nature. Understanding the Nature is vital for human self-preservation. They established a university to study logic. The original Rig Veda, Upanishads, and Bhagavad Gita were textbooks on logic. They all dealt with the relationship between Mind and Matter, called the Truth (Satyam). The extant versions of these books are plain rubbish, devoid of logic and reason. They were deliberately vandalized by the Greeks to destroy the Hindu University and the logic-based Hindu civilization.

Hindu were formed into social clusters, called Republics. Each cluster had an appointed administrator called the Rajan. The Rajan were the custodians of logic, the professors of the Hindu University. The Rajan was the exact opposite of a King (warlord). The concepts of King, War, Weapons, and God were European (R1) inventions. They never existed in India before the Greeks. They are found only in the recent Greek financed vandalized sections of the Indian literature. They are telltale evidence of vandalism.

The Hindu University had no central campus. It was distributed over several Republics. Students moved from one Republic to the next. Logic was the essence of the Hindu University.

The Rajan, professors of the Hindu University, constantly visited each other as visiting professors, to share their knowledge. They had seminars and public debates to encourage public participation to disseminate knowledge.

Some Rajan held conferences, called Councils, and hosted several professors in one place for open discussions on specified topics, to resolve complex issues. The proceedings of such Councils were well documented for posterity as the Upanishads. The original Upanishads were the textbooks on logic at the University.

Siddhartha, Mahavira, Ajatashatru, and Vasudeva Krishna were Rajan of adjacent Republics, where the four tributaries of the Ghaghara met. They were the distributed faculty of the Hindu University. They were great logicians who perfected the Hindu Scientific Method.

Professor Siddhartha invented a system of logic that was later known as the Strict Science. It was a refinement of the logic of the original Bhagavad Gita (Science). It was the foundation of the modern scientific method of Newton and Einstein, called the Logic of Hypothesis Testing. It was the exact opposite of the Aristotle's Deduction and Induction.

Professor Ajatashatru hosted the First Council (conference) on Siddhartha's logic. Professor Mahavira hosted the Second Council. The Third Council was hosted by Ashoka. These Councils were on Siddhartha's logic. They were the original Upanishads. They were deliberately trashed by the Greeks, to destroy the University.

Idolatry was a Greek invention. In India, before the Greeks, there was no archeological evidence of idolatry. The fictional warmongering gods with supernatural powers were invented by the Greeks to rob India. They were custom built to meet Indian tastes.

Greeks invented the concept of a Temple as a tax collection office. They promoted local popular heroes to god status to be housed in temples. They employed the delusional Kashmir Brahmin, to vandalize local legends and landmarks to glorify the temple gods with supernatural powers. They invested in temples as a business. It was a highly profitable business.

Kashmir Brahmin were genetically the DNA R1a1, the same as Persia, a subgroup of the R1. They were Persian refugees living in Kashmir. They were expelled from Persia for being delusional. The Greeks discovered the delusional Brahmin who believed in supernatural powers and put them to good use to vandalize the Indian literature. Brahmin were put on the Greek payroll as the Greek mouthpieces.

When the Greeks were looking for a local hero to be promoted to god status to rob Persia, they were ignorant of the Vindhya, Hindu University, and professor Siddhartha. There were local folktales in Persia about a mythical Siddhartha who encouraged free basic education. The folktales were invented to encourage children to get basic education to become successful in life. The Greeks took advantage of the popular mythical folk hero to rob the Persian people.

The Greeks employed the delusional Kashmir Brahmin (R1a1) to invent a fictional story of the mythical Siddhartha cast as the Buddha. They used Buddha to rob Persia.

By around 500 CE, the people in Persia came to the realization that they were victims of the Greek con-artists who were robbing them with the fictional Buddha. They kicked the Greeks and Buddha out of Persia.

Three hundred years after they invented the fictional Buddha to rob Persia, the Greeks reached the Vindhya. They were kicked out of Persia. They were astute businessmen. Nalanda was the first place they visited in the Vindhya.

The Greeks wanted to sell the fictional Buddha to the people at the Vindhya, just as they did in Persia for the past three hundred years. They penetrated a new market territory. The present-day Nalanda ruins were the headquarters of their business. They were experienced sales people. They knew how to market a new product, with eye catching monuments (billboards). They built an imposing central campus to market Buddha. The Hindu University never had a central campus.

The Greeks were pleasantly surprised that the mythical folk hero Siddhartha of Persia was a shadow of a real person at the Vindhya. They tasked the delusional Kashmir

Brahmin (R1a1) to rewrite all the books on Buddha to incorporate local legends and landmarks at the Vindhyas. The recent Greek financed Brahmin rubbish was actively promoted as the true history of antiquity.

The logic at the Hindu University was an existential threat to the Greek robbery business. Buddhism (blind faith) was the exact opposite of logic. The Greeks tasked the delusional Kashmir Brahmin (R1a1) to vandalize all the books at the Hindu University to worship manuals of fictional gods with supernatural powers. The recent Greek financed Brahmin rubbish was actively promoted as the ancient Hindu sacred texts.

The Greeks (R1b), with the help of the Kashmir Brahmin (R1a1), destroyed the Hindu University and the historic Hindu cultures. It happened only after 500 CE. All the so-called sacred texts were the recent Greek financed Brahmin rubbish.

Professor Siddhartha of the Hindu University was the exact opposite of the fictional Buddha of the Buddhist University established by the Greeks.

The original Rig Veda, Upanishads, and Bhagavad Gita were textbooks on logic at the Hindu University. They were reduced to worship manuals of fictional warmongering gods with supernatural powers. The Hindu logic of thousands of years was assassinated.

Using scientific tools, we were able to excavate bits and pieces of the original texts of logic used at the Hindu University. We had to identify and discard a mountain of the Greek financed Brahmin rubbish. The rubbish was reduced to ashes when tossed in the fire of logic. The damage was extensive.

The logic-based cultures that existed at the Vindhyas for thousands of years were deliberately and totally destroyed by the Greeks to introduce idolatry to India.

The Hindu University was obliterated by the Greeks. It was the end of the logic-based Hinduism. It was the beginning of the Greek financed ignorance-based Brahminism of fictional warmongering gods with supernatural powers.

Brahmin and Caste system never existed in India before the Greeks. They are the telltale evidence of the recent Greek financed Brahmin rubbish.

The logic-based Hindu University and Hindu civilization are now lost.
