

## **The Agni People, an Archeological View**

Originally, the word Agni (Fire) referred to a system of logic, called Fire Logic, also known as “Infer Fire from Smoke:” Where there is Smoke there must be Fire. The people who invented the Fire Logic were known as the Agni.

Idolatry was a Greek invention to rob people. The Greek colonialists in India deliberately misinterpreted the word Agni as a temple god of worship. They employed Brahmin, the unethical Persians, to vandalize all the Agni logic based literature to worship manuals of a fictional God Agni. Before the Greeks, Brahmin did not have God Agni; they had only the Persia gods Shiva, Vishnu, and Indra.

The original Rig Veda was a treatise on the Agni (Fire Logic) composed in the Agni language called Grandhika. The extant Rig Veda was composed in Sanskrit (Grandhika + Avestan) invented by the Greeks. Avestan was the language of Brahmin. All the Sanskrit literature was recent Greek financed Brahmin rubbish. It was a collection of non-verifiable and nonsensical statements, the exact opposite of logic.

Humans, Homo Sapiens, originated in Africa 200,000 years ago. The Asia Clade (DNA C, F), moved out of Ethiopia (Africa) in search of dependable perennial rainwater. At that time, much of the world was covered with glaciers, and the seawater was far below the current levels. It was a different landscape. The C moved on to China. The F lived in India. Culturally, the Asia Homo Sapiens (warm climate) were the exact opposite of the Europe Homo Sapiens (cold climate). The Europe Sapiens were the DNA R1.

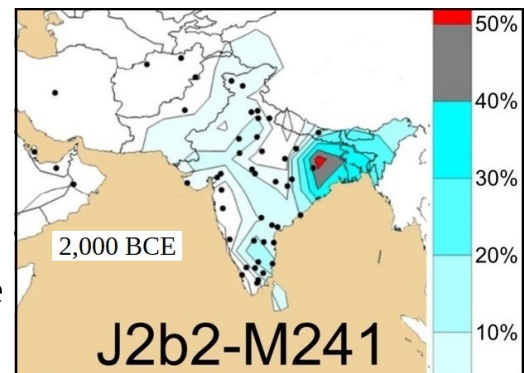

The F was split into subgroups. The J2b lived in the current submerged Persian Gulf, the H lived in the Narmada river delta 200 miles west of Mumbai (Bombay) 500 feet below the current sea levels, and the O lived in Bay of Bengal.

Twenty thousand years ago, the glaciers started to melt. The Persian Gulf was submerged. At that time, there was a giant catch basin around the Mt. Trikuta of the Vindhya with inexhaustible supply of rainwater to feed many rivers. The subgroups of F (H, J2b, O) moved to the Trikuta.

The J2b (Agni) lived to the west side of the Trikuta, along the Ken river. The H lived along the Narmada river, and the O lived along the Sone river.

Around 2,200 BCE, there was a global drought that lasted for almost 200 years. The Trikuta basin dried out. The F at the Trikuta were forced to move to the east side, the current Bihar and Odisha States. The density map shows the new location of the Agni (J2b) after the drought. The white space in the middle was the Trikuta that dried out. All the people were forced to move to the east.

The J2b established a University near the Patna City (Bihar State). The original Rig Veda and Bhagavad Gita were books on logic at the University composed in the Grandhika. Sanskrit was invented by the Greek colonialists only recently, after 200 BCE, to deliberately vandalize the logic based Grandhika literature to ignorance based rubbish. The Greeks falsely promoted Sanskrit as a language of antiquity. Linguists promoted false theories of Sanskrit history to get their papers published.

Sun rituals were originally developed by the J2b, to keep track of seasons. They were based on Direct Knowledge, sensory Perception.

Agni rituals were a logical extension of Sun rituals. The J2b invented the concept of Inference (Infer Fire from Smoke), a system of logical deduction. Agni rituals were based on Indirect Knowledge, logical Inference.

The J2b at the Patna University invented a new system of logic. They realized that knowledge was both subjective and objective. Subjective knowledge changed from person to person, and reflected bias and prejudices. Objective knowledge must be independent of bias and prejudices; all people, always, must reach the same conclusion.

The J2b at Patna developed a system of reasoning to eliminate Subjective knowledge. If a Proposition (Hypothesis, Adhikarana) were rejected with verifiable facts, then it was Objective Knowledge. It would produce the same predictable outcome every time. An empirically rejected hypothesis was called Sabda, the Objective Knowledge.

Sabda was the equivalent of a present-day controlled experiment, that can be repeated with the same predictable outcome.

The original Rig Veda, composed in the Grandhika, was a compilation of Objective Knowledge (Sabda). It was pure logic. The extant Rig Veda, composed in Sanskrit, was a worship manual of fictional Persia gods of the Zend Avesta.

A new system of logic called Sankhya, based on Perception (Direct), Inference (Indirect), and Sabda (Objective) was invented. The original Bhagavad Gita, composed in the Grandhika, was an exposition of the Sankhya logic.

Sanskrit was a mixture of only Grandhika and Avestan. The Persia Zend Avesta was pure Avestan. Using scientific tools, we purged Avestan from Sanskrit to excavate the original Grandhika Rig Veda and Gita.

The excavated Grandhika literature has a different story to tell. The J2b invented the Direct, Indirect, and Objective logic. The logic of the Grandhika Rig Veda and Gita was the foundation of the modern scientific method of Newton and Einstein called the Logic of Hypothesis Testing. It was the exact opposite of the Greek Aristotle's logic of Deduction and Induction. It was incomprehensible to the Greeks. The Greeks deliberately destroyed it. They trashed the Rig Veda and Gita to Sanskrit rubbish.

The Agni (J2b) invented logic. Hindu Scientific Method reached its Zenith in the Grandhika Rig Veda and Gita. Unfortunately, it was assassinated by the Greek colonialists and their Brahmin stooges.
