

## The Indian People, an Archeological View

The current political boundaries of India represent the Greek occupied territory. It is the Greek India, not the ancient India. The ancient India existed for 60,000 years, only to the south of the Yamuna river. The area to the north of the Yamuna had no human population until the recent European immigrants entered India, from Bactria, 4,000 years ago.

What is commonly known as the Indian history is the history of the European immigrants of the north, not that of the ancient India of the south. The history of the ancient India was never recorded.

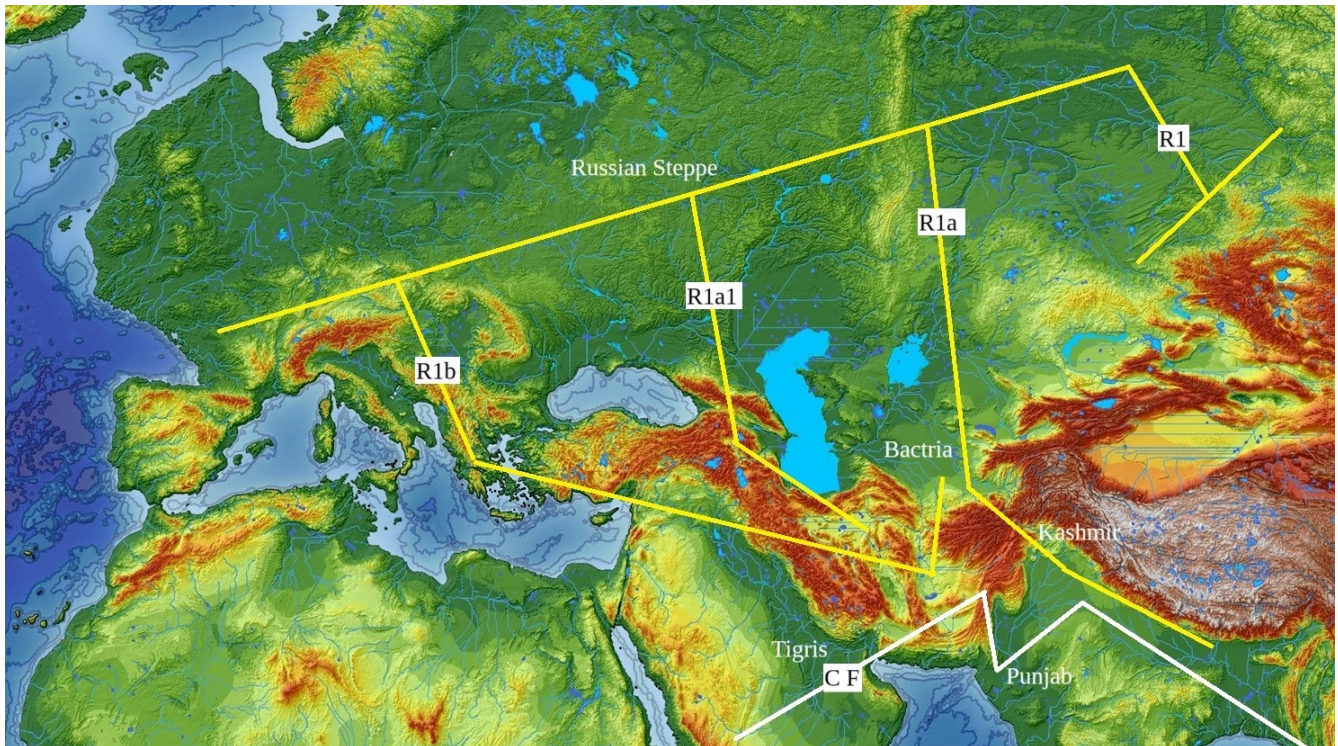

The above map is a computer simulation of the landscape when much of the world was covered with glaciers and the seawater was far below the current levels.

Ancient India was the DNA C and F people. They lived only along rainwater rivers. They avoided the Himalayas and its rivers of snowmelt water like the plague, see [the Indus](#). The white line in the above map is a path of continuous perennial rainwater rivers from Africa to India to China. They were the Asia Clade of Africa Homo Sapiens.

The Asia Clade (C, F) evolved as a distinct category of Africa Homo Sapiens, in the tropical zone, along the Equator, only to the east of the Red Sea. They had nothing to do with the Africa or Europe Homo Sapiens.

The Asia Clade discovered the path 60,000 years ago, and lived only along the path. They painted caves, near Australia, 50,000 years ago, see [Sunda cave art](#). They voluntarily left Ethiopia (Africa), 100,000 thousand years ago, in search of dependable perennial rainwater resources. They were Hindu, the native Indians.

The above map is a computer simulation of the landscape of Europe when it was covered with glaciers. The glaciers started to melt 20,000 years ago. Ten thousand years ago it was a swamp, the Russian Steppe. Some Europe Home Sapiens moved in and evolved into the current European cultures (Europe Clade). They were the DNA R1. The R1 were split into the R1a (Eastern Europeans), R1a1 (Persians), and R1b (Greeks).

The R1 (Europe Homo Sapiens) who lived only in the glacial zone had nothing to do with the C and F (Asia Homo Sapiens) who lived only in the tropical zone. Functionally, they were the exact opposite cultures.

Around 2,200 BCE there was a global drought and some R1 moved south to Bactria. From Bactria they moved to Kashmir. Kashmir was the only port of entry to the north side of the Yamuna.

Some R1a (Eastern Europeans) moved to Kashmir around 2,200 BCE. Some Persians (R1a1) moved to Kashmir around 500 BCE. The Greeks (R1b) moved to Kashmir around 200 BCE, after Alexander. They lived only to the north of the Yamuna. They were unaware of the Asia Clade that lived only to the south of the Yamuna.

Around 500 CE, the Gupta empire collapsed and Greeks occupied the area to the south of the Yamuna. There was population mobility between the North and South only after the Greek occupation (500 CE).

The current Indian history was financed by the Greeks (R1b) and was invented by the delusional Persians (R1a1) in Kashmir. The R1a1 never had intellect or logic. They were fiction writers for hire on the Greek payroll. Their version of Indian history was the R1 culture that lived only to the north of the Yamuna for less than 4,000 years.

The R1 were falsely portrayed as Hindu. The native Hindu (C, F) never lived to the north of the Yamuna. They avoided the Himalayas and its rivers of snowmelt water like the plague. Worship of the Himalayas and its rivers (Indus and Ganges) was the R1 culture.

The R1 were constantly at war to rob each other. It was the culture of Europe Home Sapiens. They lived in a land of scarce food. They worshiped war and god. The R1 worshiped the Himalayas as the abode of their gods. They lived only along the rivers of the Himalayas.

All the stories of warmongering people, gods, and demons with supernatural powers that lived in the Himalayas reflected the R1 culture. People who wrote books on Indian history were ignorant of the land to the south of the Yamuna.

The R1 evolved from the Ice Age and Stone Age, after the glacial melt. The C and F lived only in the tropical zone for 100,000 years; they were warm and toasty. They never heard of Ice Age or Stone Age. They painted the Sunda caves 50,000 years ago.

The Greek India and the Ancient India were the exact opposites. The Greek (R1b) financed Persian (R1a1) rubbish was actively promoted as the Indian history.
