Originally, the word Agni (Fire) referred to a system of logic, called Fire Logic, also known as “Infer Fire from Smoke:” Where there is Smoke there must be Fire. The people who believed in the Fire Logic were known as the Agni.

Idolatry was a Greek invention to rob people. The Greeks who occupied India, deliberately misinterpreted the word Agni as a temple god of worship. They employed the unethical Persians (Brahmin) to deliberately vandalize all the Agni literature to worship manuals of a fictional God Agni (Fire) with supernatural powers.

The original Rig Veda (2,000 BCE) was a treatise on the Agni (Fire Logic). The fictional God Agni was invented, by the Greeks, to destroy the Rig Veda logic. The extant Rig Veda was Greek financed Brahmin rubbish, invented only after 200 BCE. The vandalized Rig Veda was actively promoted as the original Rig Veda.

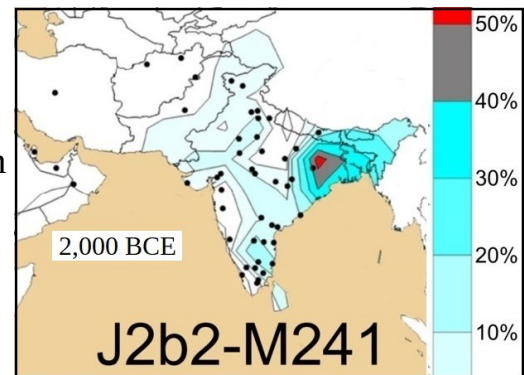

Humans, Homo Sapiens, originated in Africa 200,000 years ago. Some of them, the Asia Clade, voluntarily migrated out of Ethiopia (Africa) to reach India, in search of dependable perennial rainwater. At that time, much of the world was covered with glaciers, and the seawater was far below the current levels. The Asia Clade moved from Ethiopia to the current Persian Gulf which was a fertile valley, called Tigris.

People who share the same DNA are called a Haplogroup. The people in the Tigris (Persian Gulf) were the DNA F. The F was split into subgroups. The J2 lived in the Tigris, the H lived in the Narmada river delta near Mumbai (Bombay), and the O lived in Balochistan. The J2b (Agni) were a subgroup of the J2.

Twenty thousand years ago, the glaciers started to melt. The Tigris was submerged to form the current Persian Gulf and Gulf of Oman. At that time, there was a giant catch basin around the Mt. Trikuta of the Vindhyas with inexhaustible supply of rainwater to feed many rivers. It was the only source of dependable rainwater on the entire subcontinent. The subgroups of F were forced to relocate to the Trikuta.

The J2 moved to Syria. The J2b (Agni), a subgroup of the J2, moved to the west side of the Trikuta, along the Ken river. The H moved to Trikuta, along the Narmada river. The O moved to the Trikuta, along the Sone river. The J2b, H, and O were relocated to the Trikuta, along different rivers, 20,000 years ago.

Around 2,200 BCE, there was a global drought that lasted for almost 200 years. The Trikuta basin dried out. The F at the Trikuta were forced to move to the east side with rainwater. They fused into a new form of culture known as Hindu. The density map shows the new location of the Agni (J2b) after the drought. The white space in the middle was the Trikuta that dried out. All the people were forced to move to the east.

Hindu (J2b, H, O) established a University, along the Yamuna river, where the four tributaries met, near the Patna city (Bihar). The original Rig Veda and Bhagavad Gita were textbooks on logic at the University. They were composed around 2,000 BCE.

Hindu (F) that lived at the Trikuta were logic-based cultures; they never had the concepts of War or God. The Greeks in India paid the unethical Persians (Brahmin) to rewrite all the logic-based Hindu literature to worship manuals of fictional warmongering gods with supernatural powers, to deliberately and totally destroy the ancient logic based Hindu cultures that lived in peace.

Sun rituals were originally developed by the J2, to keep track of seasons. They were the Direct Knowledge, based on sensory Perception.

Agni rituals were a logical extension of Sun rituals. The J2b invented the concept of Inference (Infer Fire from Smoke), a system of logical deduction. Agni rituals were the Indirect Knowledge, based on logical Inference.

Hindu University invented a new system of logic. They realized that knowledge was both subjective and objective. Subjective knowledge changed from person to person, and reflected bias and prejudices. Objective knowledge must be independent of bias and prejudices; all people, always, must reach the same conclusion.

Hindu University developed a system of reasoning to eliminate Subjective knowledge. If a Proposition (Hypothesis, Adhikarana) were rejected with verifiable facts, then it was Objective Knowledge. It would produce the same predictable outcome every time. An empirically rejected hypothesis was called Sabda, the Objective Knowledge.

Sabda was the equivalent of a present-day controlled experiment, that can be repeated with the same predictable outcome.

The original Rig Veda was a compilation of Objective Knowledge (Sabda). It was pure logic invented by Hindu. The extant Rig Veda was Greek rubbish, devoid of logic and reason. It was deliberately vandalized to promote idolatry, worship of fictional gods.

A new system of logic called Sankhya, based on Perception (Direct), Inference (Indirect), and Sabda (Objective) was invented. The original Bhagavad Gita, was an exposition of the Sankhya logic. It was a textbook on logic, written by professor Vasudeva Krishna. The extant Bhagavad Gita is Greek rubbish, devoid of logic and reason, invented to promote idolatry.

Using scientific tools, we were able to excavate bits and pieces of the original textbooks on logic at the University. The Greek rubbish was reduced to ashes when tossed in the fire of logic. The excavated material has a different story to tell.

Hindu (F) never had any sacred books or gods. All knowledge was subject to logical scrutiny, nothing was sacred. Hindu logic was assassinated by the Greeks.

The fictional God Agni (Fire) of the Rig Veda was invented by the Greeks, in Kashmir, to vandalize the Rig Veda, after 200 BCE. The vandalized Rig Veda was actively promoted as of antiquity. All the other gods of the Rig Veda were Persia gods (Zend Avesta) embedded in the Rig Veda by the unethical Persians (Brahmin). Persia never had the God Agni. God Agni was a Greek invention to deliberately destroy the Agni Logic of the Rig Veda.
