

The Agni People, an Archeological View

Originally, the word Agni (Fire) referred to a system of logic, called Fire Logic, also known as “Infer Fire from Smoke:” Where there is Smoke there must be Fire. The people who believed in the Fire Logic were known as the Agni.

Idolatry was a Greek invention to rob people. The Greeks who occupied India, deliberately misinterpreted Agni (Fire) as a temple god of worship. They employed the delusional Kashmir Brahmin (Persians) to deliberately vandalize all the Agni literature to worship manuals of a fictional God Agni with supernatural powers.

The original Rig Veda was a treatise on the Agni (Fire Logic), nothing to do with gods. The extant Rig Veda is Greek rubbish, invented to deliberately destroy the Agni culture.

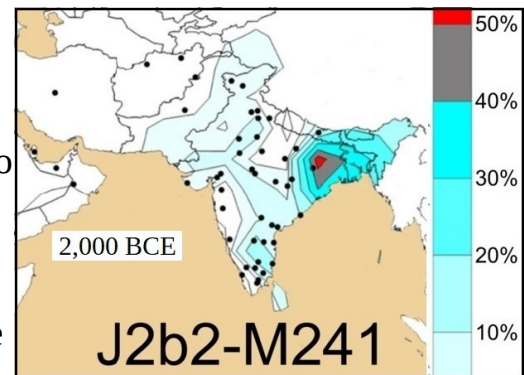

Humans, Homo Sapiens, originated in Central Africa 200,000 years ago. Some of them voluntarily migrated out of Africa to reach India, in search of dependable perennial rainwater. At that time, much of the world was covered with glaciers, and the seawater was far below the current levels. The current Red Sea was a giant rainwater lake, the current Persian Gulf was the Tigris river, and the West Coast of India extended over 200 miles to reach the then Arabian Sea.

People who share the same DNA are called a Haplogroup. The people in the Tigris (Persian Gulf) were the DNA F. The F was split into subgroups. The J2 lived in the Tigris, the H lived in the Narmada river delta near Mumbai (Bombay), and the O lived in Balochistan. The J2b (Agni) were a subgroup of the J2.

Twenty thousand years ago, the glaciers started to melt. The Tigris was submerged to form the Persian Gulf and Gulf of Oman. At that time, there was a giant catch basin surrounding the Mt. Trikuta of the Vindhya with inexhaustible supply of rainwater to feed many rivers. It was the only source of dependable rainwater on the entire subcontinent. The subgroups of F were forced to relocate to the Trikuta.

The J2b (Agni), a subgroup of the J2, moved to the west side of the Trikuta, along the Ken river. The J2 moved to Syria. The H moved to Trikuta, along the Narmada river. The O moved to the Trikuta, along the Sone river. The J2b, H, and O were relocated to the Trikuta, along different rivers.

Around 2,200 BCE, there was a global drought that lasted for almost two hundred years. The Trikuta basin dried out. The F at the Trikuta were forced to move to the east side with rainwater. They fused into a new form of culture known as the Hindu. The density map shows the new location of the Agni (J2b) after the drought. The white space in the middle was the Trikuta that dried out. All the people were forced to move to the east.

Hindu (F) established a University, along the Yamuna river, where the four tributaries met, near the Patna city. The original Rig Veda and Bhagavad Gita were textbooks on logic at the University.

Hindu (F) that lived at the Trikuta were logic-based cultures; they never had the concepts of War or God. The concepts of King, War, Weapons, and God were invented by the Europeans who were constantly at war to rob each other. The Greeks in India paid the delusional Kashmir Brahmin (Persians) to rewrite all the logic-based Hindu literature to worship manuals of fictional warmongering gods with supernatural powers. The recent Greek rubbish was actively promoted as the ancient sacred texts of Hindu.

Sun rituals were originally developed by the J2, to keep track of seasons. They were the Direct Knowledge, based on sensory Perception.

Agni rituals were a logical extension of Sun rituals. The J2b invented the concept of Inference (Infer Fire from Smoke), a system of logical deduction. Agni rituals were the Indirect Knowledge, based on logical Inference.

The newly formed hybrid Hindu culture invented a new system of logic. They realized that knowledge was both subjective and objective. Subjective knowledge changed from person to person, and reflected bias and prejudices. Objective knowledge must be independent of bias and prejudices; all people, always, must reach the same conclusion.

Hindu developed a system of reasoning to eliminate Subjective knowledge. If a Proposition (Hypothesis, Adhikarana) were rejected with verifiable facts, then it was Objective Knowledge. It would produce the same predictable outcome every time. An empirically rejected hypothesis was called Sabda, the Objective Knowledge.

Sabda was the equivalent of a present-day controlled experiment, that can be repeated with the same predictable outcome.

The original Rig Veda was a compilation of Objective Knowledge (Sabda). It was pure logic invented by Hindu. The extant Rig Veda was Greek rubbish, devoid of logic and reason. It was deliberately vandalized to promote idolatry, worship of fictional gods.

A new system of logic called Sankhya, based on Perception (Direct), Inference (Indirect), and Sabda (Objective) was invented. The original Bhagavad Gita, was an exposition of the Sankhya logic. It was a textbook on logic, written by professor Vasudeva Krishna. The extant Bhagavad Gita is Greek rubbish, devoid of logic and reason. It was deliberately vandalized to promote idolatry, worship of fictional gods.

The Greeks destroyed the ancient Hindu civilization with idolatry. Kashmir Brahmin (Persians) were delusional, and never had any intellect or logic. They were fiction writers on the Greek payroll. In India, before the Greeks, there was no archeological evidence of Brahmin, Caste System, Gods, Temples, or Idolatry. The recent Greek rubbish was actively promoted as the sacred texts of Hindu.

Using scientific tools, we were able to excavate bits and pieces of the original textbooks on logic at the University. The Greek rubbish was reduced to ashes when tossed in the fire of logic. The excavated material has a different story to tell.

Hindu (F) never had any sacred books. All knowledge was subject to logical scrutiny, nothing was sacred. They lived in peace and prosperity for 60,000 years. They painted caves in the Sulawesi island of Indonesia (Sunda land) 50,000 years ago. They were an advanced logic based culture before they voluntarily left Ethiopia (Africa) 100,000 years ago. They never had a war or god. They were democratic republics with open borders. They were compassionate and respected other peoples' rights and property. They lived only in the Tropical Zone, around the Equator. They never had glaciers, Ice Age, or Stone Age. They had abundant supply of perennial rainwater and food supplies. They devoted their time to logic and cultural enrichment. They avoided the Himalayas and its rivers of snowmelt water like the plague. They lived only to the south of the Yamuna river. They had nothing to do with the Homo Sapiens of Central Africa, Ethiopia, or Europe.

The ancient Hindu civilization was deliberately and totally destroyed by the Greeks. What is currently known as Hindu civilization is the recent Greek rubbish.
