

The Ancient History of India, an Archeological View
by Potluri Rao In Seattle ©2018 (CC BY 4.0)

The current version of ancient history of India has no scientific basis. It is derived mostly from the fictional stories invented by Greeks to rob India. Idolatry was a Greek invention. In India, before the Greeks, there was no archeological evidence of Brahmin, Caste System, Gods, Temples, or Idolatry.

The Greeks in India employed delusional Kashmir Brahmin (Persians) to invent the fictional Indian history. The extant Vedas, Puranas, Epics, and Dharmashastras were the Greek rubbish invented after Alexander (300 BCE). They reflect the European culture, not the Hindu culture. They were actively promoted as of divine origin to rob the gullible Indians.

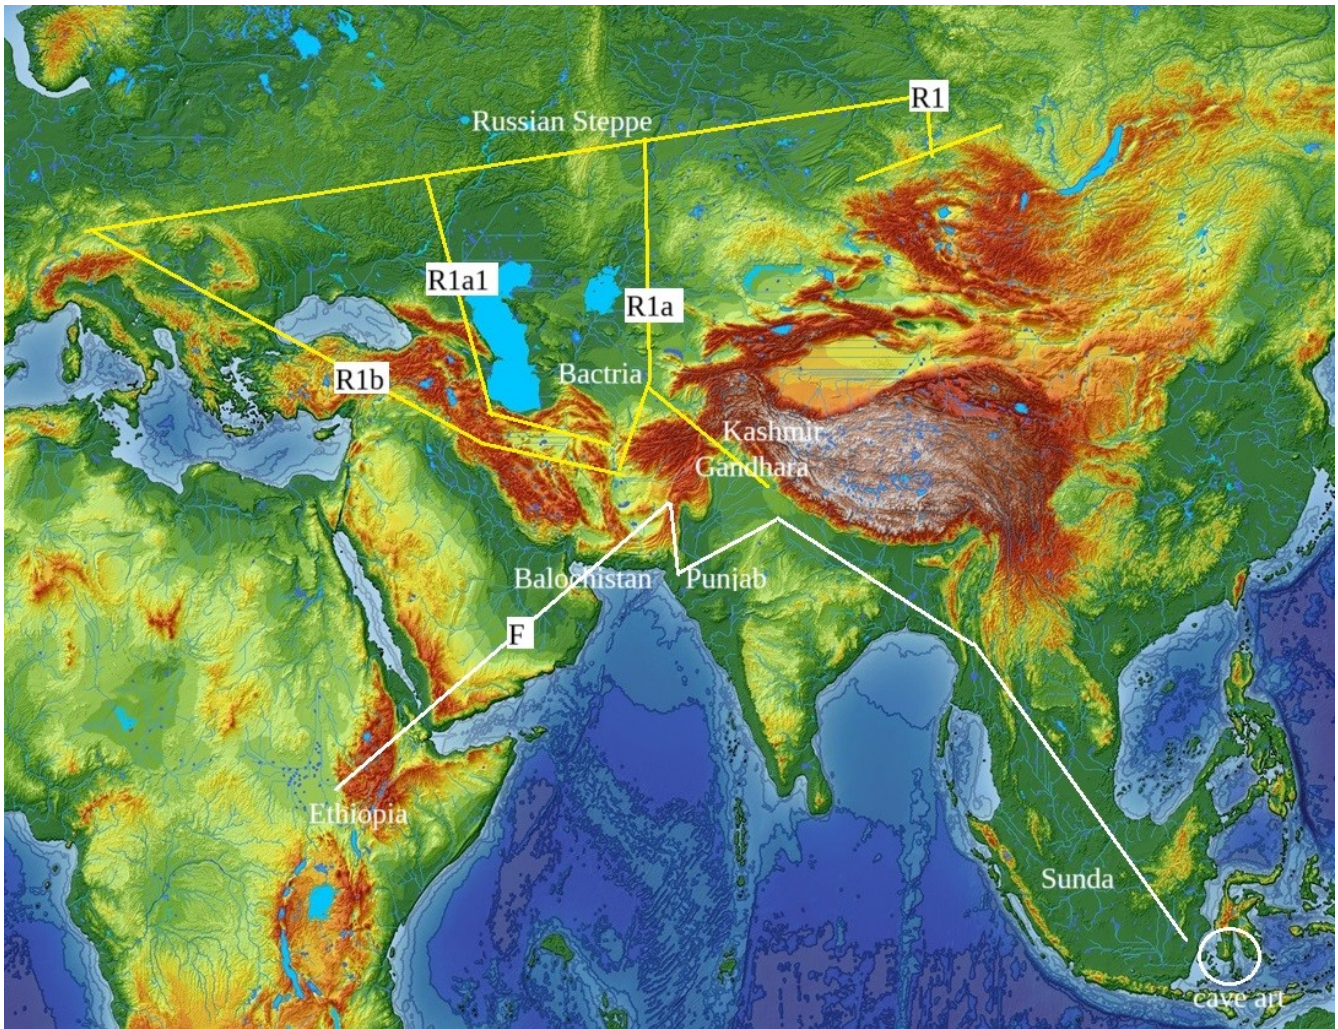

Archeological evidence has an entirely different story of ancient India. Before the Greeks, India consisted of two different worlds: (1) Hindu India of native people who lived for more than 60,000 years, and (2) Gandhara India of European immigrants who lived for less than 4,000 years. Hindu never lived along the Himalayas or any of its rivers. Gandhara lived only along the Himalayas and its rivers. Hindu and Gandhara were the exact opposite cultures. They were unaware of each other.

The world is divided into two climate zones: (1) Tropical Zone around the Equator, and (2) Glacial Zone that was buried under glaciers. Tropical Zone never had any glaciers. Hindu lived only in the tropical zone with abundant supply of food resources. Gandhara people evolved in the Glacial Zone, after the glacial melt, with scarce food.

The glaciers started to melt 20,000 years ago. Before the glacial melt, the seawater was far below the current levels. Hindu lived only in the Tropical Zone. Their original homeland of 100,000 years is now submerged under 500 feet of water.

To reconstruct the original homeland of Hindu, we used computers to artificially lower the sea levels by 500 feet. We superimposed data from DNA samples on the landscape to discover the ancient Hindu history.

People who share the same DNA are called a Haplogroup. Hindu are the DNA F. They voluntarily left Ethiopia (Africa) 100,000 years ago, and traveled along the white line, in the map below, to reach Sunda. They painted caves in Sunda of pigs they hunted for food. The Sunda cave art was dated to be more than 50,000 years old. Hindu were in Sunda from 60,000 BCE to 20,000 BCE. Sunda was submerged after 20,000 BCE.

The above map was computer generated to reflect the landscape before the glacial melt.

When Sunda and Balochistan were submerged after 20,000 BCE, Hindu were forced to seek shelter in India around the Mt. Trikuta, the current Damoh, Jabalpur, and Katni districts of the Madhya Pradesh State. At that time, the Trikuta was a giant lake of rainwater. It was the only place with human population on the subcontinent.

The Glacial Zone was covered with glaciers. The glaciers started to melt only after 20,000 BCE. The Russian Steppe was a swamp, and was habitable only after 10,000 BCE. Some primitive Europe Homo Sapiens (DNA R1) followed the grazing animals to the Steppe. They were the Stone Age people. They evolved from Stone Age to Iron Age to European cultures. They evolved into social clusters by 6,000 BCE, and spread across Europe.

The R1 was split into three groups: (1) R1a the Eastern Europeans, (2) R1a1 the Persians, and (3) R1b the Greeks, Romans, and British.

Around 2,200 BCE there was a global drought and some of the R1 were forced to move south. They converged to Bactria. In Bactria, they discovered a mountain pass to Kashmir and Gandhara. Gandhara was the land of the Indus river and its tributaries.

The people in Bactria, Kashmir, and Gandhara were the R1, not Hindu (F). Hindu never lived along the Himalayas or any of its rivers. They were rainwater people.

The Greeks moved from Bactria to Kashmir around 200 BCE. They moved from Kashmir to Gandhara around 200 CE. They moved from Gandhara to the Trikuta, the Hindu India, around 500 CE.

Idolatry was a Greek invention. The Greeks transformed idolatry into a temple business to rob both Gandhara and Hindu. They discovered the delusional Kashmir Brahmin (Persians) and hired them to invent fictional stories of warmongering gods with supernatural powers. They deliberately vandalized all the Hindu literature to worship manuals of fictional warmongering gods of European culture. They actively promoted the Greek rubbish as of divine origin. The Greek rubbish is being taught as the ancient Indian history.

A scientific analysis revealed that of the extant versions 50% of the Ramayana, 80% of the Mahabharata, 90% of the Rig Veda, and 100% of the Yajur Veda were Greek rubbish.

The Greek rubbish was a collection of non-verifiable and nonsensical statements that was reduced to ashes when exposed to logic.

In the Ramayana, Rama's father ruled for thousands of years before reluctantly giving up reign. Rama ruled for 11,000 years. People in the Ramayana routinely lived for thousands of years. Anyone, with critical thinking skills, would realize that no human ever lived much over 100 years. Life expectancy of thousands of years is sufficient to prove that it was rubbish.

In the Ramayana, a Brahmin Muni used his supernatural powers to intentionally produce a baby with ten heads. Ravana was a Brahmin child with ten heads. The grotesque unnatural Ravana was Greek rubbish.

The God Gopala-Krishna was invented in the fictional Bhagavata Purana (500 CE). The God Radha-Krishna was invented in the fictional Brahma Vivarta Purana (700 CE).

Stories of Krishna as a miracle maker were in high demand. A compilation of all the fictional stories of Krishna was called the Harivamsa Purana. It was a part of the epic Mahabharata. Gods performing miracles on demand was Greek rubbish.

The original Rig Veda was a textbook on logic at a University. It was trashed to a worship manual of fictional gods. It was Greek rubbish.

Hindu lived only in the Tropical Zone. They voluntarily left Ethiopia (Africa) 100,000 years ago. They had nothing to do with glaciers, Ice Age, Stone Age, Africa Homo Sapiens, or Europe Homo Sapiens. They never lived in the Himalayas or along any of its rivers. They lived only along rainwater rivers. They painted Sunda caves 50,000 years ago. They lived in peace and tranquility. They never had a war or god. They were forced to move to the Trikuta after 20,000 BCE by the climate. Their culture was deliberately and totally destroyed by the warmongering Europeans. All the stories of warmongering gods and demons with supernatural powers were the Greek rubbish.
