Indian Gods: An Archeological View

Hindus (DNA F) lived in Peninsular India for over 60,000 years. They were highly advanced logic-based cultures. They lived in peace and tranquility as one giant family. They were clusters of democratic republics with open borders. Peaceful coexistence of clusters was the essence of Hindu civilization. Peace and prosperity with fair trade was their political philosophy. They invented the Hindu logic, now known as the logic of hypothesis testing. Grandhika was the language of Hindus. The original books on Hindu logic and civilization were written in Grandhika.

Europeans evolved only recently, in the Russian Steppe, after the glacial melt and evolved into primitive warmongering cultures that were constantly at war to kill each other. They invented the concepts of king, war, weapons, and god to mobilize people to blindly follow cult leaders to go to wars and get slaughtered. It was the European culture, the exact opposite of the now-lost Hindu civilization.

The temple god was a Greek invention. Greeks were snake oil salespeople. They invented Greek logic based on some assumptions of divine origin, called "Axioms." People were forced to accept the Axioms by blind faith. Anyone who doubted the validity of an Axiom was beheaded. Socrates was beheaded. Greek logic was the exact opposite of Hindu logic. Axioms were forbidden in Hindu logic.

Hindus accepted only empirically validated statements, called "Vidya," as the true knowledge (Satyam). A non-verifiable and nonsensical statement was called "Avidya" and was discarded. Hindu logic was a process to separate Vidya from Avidya, called "hypothesis testing." In Hindu logic nothing is sacred; only Vidhya is Satyam.

Greeks invented a synthetic language called Sanskrit as a mixture of the Grandhika of Hindus and an Avestan dialect of Persia. Sanskrit was a bastardized version of Grandhika designed to deliberately destroy Hindu logic and civilization. The Greeks employed some delusional, unethical, and immoral Persians, called Brahmins (DNA Z93), to trash all Hindu Grandhika literature into Sanskrit literature of Greek Avidya.

All the Sanskrit literature was non-verifiable and nonsensical statements, the Greek Avidya, the exact opposite of Hindu logic. It was reduced to ashes when tossed in the fire of the Hindu logic of hypothesis testing. God was a Greek Axiom. Axioms were forbidden in Hindu logic. Gods are found only in the Greek rubbish.
